#### **DETAILED ACTION**

The Examiner acknowledges the applicant's remarks and arguments of October 11, 2007made to the office action filed June 11, 2007. Claims 1, 9, 13, 15 and 19-24 are pending. Claims 1, 9, 13, 15 and 19-24 are amended, and claims 2-8, 10-12, 14, 16-18 and 25-30 are cancelled.

In light of the amendments and because the Applicant's arguments were found persuasive, all previous rejections are withdrawn.

Due to all previous rejections being withdrawn, the new claim rejections are made below.

Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

## Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 9 recites the limitation "wherein the endothelin antagonist comprises" in lines 1-2. There is insufficient antecedent basis for this limitation in the claim. The

Application/Control Number:

10/659,579 Art Unit: 1617

claim 1 does not support the claim language of the endothelin antagonist "comprising". In claim 1, the endothelin antagonist is "selected from the group consisting of...." The comprising language in claim 9 reads on a mixture of endothelin antagonist, which is not supported in claim 1.

### Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- (1) Claims 1 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hughes et al. (US 2003/0040534 A1) in view of Wu (Expert Opinion on Therapeutic Patents, 2000, Vol. 10, No. 11, pp. 1653-1668).

Hughes et al. teaches a compound that is an endothelin antagonist of ET-1 and ET-2, and are useful in treatment of conditions associated with increased ET levels and of all endothelin-dependent disorders such as for the treatment of Alzheimer's dementia (see page 2, paragraph 11, lines 1-5 and paragraph 18 in its entirety).

Hughes et al. does not teach the Applicant's elected endothelin antagonist compound bosentan.

Wu teaches that bosentan is an endothelin antagonist, particularly a mixed ET<sub>A</sub>/ET<sub>B</sub> antagonist that has even been used in clinical trials (see page 1658, section 2.3, in particular.)

Accordingly, it is considered that one of ordinary skill in the art at the time the invention was made would have found it obvious and motivated to provide the bosentan of Wu in the treatment of Alzheimer's dementia as taught by Hughes et al, because Hughes et al. teaches that Alzheimer's dementia is associated with endothelin disorders and can be treated by providing endothelin antagonists having ET1/ET2 antagonist activity (which is directly associated with ET<sub>A</sub> and ET<sub>B</sub>), whereas Wu teaches that bosentan is a compound having known ET<sub>A</sub>/ET<sub>B</sub> mixed antagonist activity. Thus, one of ordinary skill in the art would have been motivated to provide the bosentan in the method of Hughes et al. with the expectation of providing a compound capable of treating Alzheimer's disease. Accordingly, claim 1 is obvious over the teachings of Hughes et al. and Wu.

In regards to the limitation of a administering to a human suffering from

Alzheimer's disease, the Examiner reads the treatment of Alzheimer's dementia to meet

this limitation. One who has Alzheimer's dementia has Alzheimer's disease and Hughes et al. treats this ailment, and thus treats Alzheimer's disease.

(2) Claims 13, 15 and 19-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hughes et al. (US 2003/0040534 A1) in view of Wu (Expert Opinion on Therapeutic Patents, 2000, Vol. 10, No. 11, pp. 1653-1668) as applied to claims 1 and 9 above in further view of Woolf (US 5,466,696).

The teachings of Hughes et al. and Wu are as applied to claims 1 and 9 above.

Hughes et al. and Wu do not teach a cholinesterase inhibitor, particularly the Applicant's elected compound tacrine as disclosed in claims 13 and 15. Hughes et al. and Wu also do not teach treatment regime disclosed in claims 19-24.

Woolf teaches tacrine and cytochrome P450 oxidase inhibitors and methods of use (see title). Clinical studies have been performed on patient's suffereing from Alzheimer's disease by utilizing tacrine (see column 1, lines 26-27).

Accordingly, it is considered that one of ordinary skill in the art at the time the invention was made would have found it obvious and motivated to provide the tacrine of Woolf in the endothelin antagonist Alzheimer's dementia treatment method of Hughes et al. in view of Wu, because Hughes et al. teach a method of treating Alzheimer's

dementia. Thus, both Hughes et al. and Woolf teach treatments of Alzheimer's disease. Therefore, it is considered that one of ordinary skill in the art would have been motivated to provide tacrine in the Alzheimer's treatment method of Hughes et al. in view of Wu, with the expectation of providing a compound capable of treatment of the condition. Note it is considered that "[I]t is prima facie obvious to combine two compositions each of which is taught by the prior art to be useful for the same purpose, in order to form a third composition to be used for the very same purpose.... [T]he idea of combining them flows logically from their having been individually taught in the prior art." In re Kerkhoven, 626 F.2d 846, 850, 205 USPQ 1069, 1072 (CCPA 1980.)

Accordingly, claims 13 and 15 are considered to be obvious over the teachings of Hughes et al. in view of Wu in further view of Woolf

Regarding claims 19-24, Hughes et al. in view of Wu in further view of Woolf render obvious providing a combination therapy of the endothelin antagonist bosentan and the ACE inhibitor tacrine for the treatment of Alzheimer's disease. Accordingly, it is considered that one of ordinary skill in the art at the time the invention was made would have found it obvious to vary and/or optimize the treatment regime, such as by providing the therapeutic agents in the same or separate compositions, or by administering one of the compounds prior to the other, according to the guidance provided by Hughes et al. in view of Wu in further view of Woolf, to provide the desired Alzheimer's treatment. It is noted that "[W]here the general conditions of a claim are disclosed in the prior art, it is not inventive to discover the optimum or workable ranges

by routine experimentation." In re Aller, 220 F.2d 454, 456, 105 USPQ 233, 235 (CCPA 1955.) It is furthermore noted that, regarding the order of administration as recited in claims 23-24, it has been held that merely changing the order of steps in a multi-step process is not a patentable modification absent a showing of unexpected results. *Ex parte Rubin* 128 USPQ 440 (POBA 1959.)

### Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

No claims allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kendra D. Carter whose telephone number is (571) 272-9034. The examiner can normally be reached on 8:30 am - 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sreeni Padmanabhan can be reached on (571) 272-0629. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
